Message from the HOD's Desk

Dear all,

It is with great pleasure that I address you on behalf of the Department of Computer Science and Engineering at Lok Nayak Jai Prakash Institute of Technology, Chapra, as we release this latest newsletter. As we continue our academic journey together, I firmly believe that every step we take will lead us toward a bright future and contribute significantly to the development of our nation.

It is our primary mission to foster technically curious minds, providing the necessary exposure and skills to serve society and strengthen our nation.

Our vision goes beyond just enhancing technical skills; we aim for the comprehensive development of our students. We achieve this by promoting a balance of co-curricular and extracurricular activities alongside our rigorous academic programs. To support this holistic growth, our department regularly organizes workshops and seminars, and encourages students to participate in various clubs, sports, literary activities, and individual projects.

This year, we are quite happy to highlight our exceptional achievements in placements and internships. Over 200 of our students have secured internships with prestigious companies, including Salesforce. This remarkable accomplishment reflects the hard work and talent of our students, the unwavering dedication of our faculty, and the strong reputation of our department. These internships offer invaluable real-world experience and open up promising career opportunities for our students.

Our faculty, who are experts in their respective fields, continue to drive research and innovation in areas such as artificial intelligence and cybersecurity. Their dedication to excellence in teaching ensures that our students receive a top-quality education, seamlessly blending theoretical knowledge with practical application.

I extend my heartfelt gratitude to everyone who has supported and contributed to the success of the Department of Computer Science and Engineering at LNJPIT.

Wishing you all the best!

App Development Boot Camp 1.0

Be An App Developer

Students of Computer Science & Engineering at Loknayak Jai Prakash Institute of Technology organized a 7-day app development boot camp from January 3, 2024, to January 11, 2024. The event was held under the guidance of Dr. Shambhu Shankar Bharti, Dr. Sudhir Kr. Pandey, and Dr. Chanchal Suman. The boot camp was inaugurated by Dr. Mithilesh Kr. Singh, who served as the Patron. During the inauguration, Dr Singh lit the ceremonial lamp and delivered a motivational speech, encouraging students to overcome negative behaviors and enhance their technical and management skills.

INTERNSHIP

Salesforce Developer

We are proud to announce that over 210 students from LNJPIT had successfully completed the 8-week Salesforce Virtual Internship program. This achievement reflects their hard work and dedication, as they gained hands-on experience with Salesforce tools and tackled real-world business challenges. Congratulations to all participants for their exceptional performance and commitment. This milestone not only enhances their technical skills but also prepares them for promising careers in the tech industry.

Well done, students!

Article: Agriculture and Food in Bihar

Bihar, the third largest state in India has a rich and long history in agriculture and food. The land of Bihar is fulfilling the agricultural needs of the country for the past several years. But it also has a wide list of problems and irregularities, which are ignored and have never been in the mainstream media. The farmers in Bihar majorly cultivate rice and wheat grains. The government, from past few years, has announced several new policies for the agriculture, but all those are never seen on ground.

As a result, the farmers keep struggling, and they never get an appropriate price for their crops. While other states like Punjab and Rajasthan are advancing with new agricultural machines and techniques, Bihar has lacked not only in terms of pricing but in techniques for agricultural management. Looking at the future, the agricultural sectors of Bihar needs modern farming techniques.

The farmers in Bihar have faced numerous amount of challenges and some of the farmers have ended their life due to hunger. The state has a variety of food production, but the shortage of food is still a challenge. As the food grains need space to preserve it from getting wasted, the government needs to work on it. Also modern farming should be promoted by the government to increase the awareness among the farmers. This will help the agriculture and food sector to get a boost.

To conclude, agriculture and food are the pillars of economy in Bihar. There should not be any compromise in the growth of the sector. Literate people should also join hands with the government to help the farmers in modernizing their farm and boosting the production, so that they can produce grains in a large scale. This will not only help the state but also the country to be the second largest economy in the world.
